In the past decade, we have seen rapid deployment of smart city infrastructure and digitization of various citizen-centric services belonging to central and state governments, aimed at delivering transparent, efficient and effective delivery of common services for citizens. Some of the popular digital India programs include Direct Benefit Transfer, MyGov, GeM, Digital Payments, DigiLocker, and UMANG among many others.

### **04. What is data protection, and why is it important?**

Financialexpress - *September 07, 2020*

India has recently banned 118 additional Chinese apps. As per reports, this ban comes under Section 69A of the Information Technology Act and is due to the illegal data collection practices followed by these apps. These apps were found to be collecting extensive information about their users without taking explicit permission. Collected information included but not limited to – data from users' clipboard, their GPS locations, and vital network related information such as IP, local IP, MAC addresses, WIFI access point names, etc.
