N5. MoRTH: The road to digitisation

Express Computer April 20 , 2019

What is the role of IT at the Ministry of Road Transport and Highways?

IT is being used in majority of initiatives undertaken by the ministry. Starting from vehicle registration and driving licenses, monitoring of road construction – all are through one or more IT tools. NIC has been actively involved in many of these. Most popular and widely used are Vahaan and Sarathi. State transport departments are issuing vehicle registration certificates and driving license using these applications.

Some of the new initiatives are Bidder Information Management System (BIMS), Bhoomi Rashi, INAMPRO, INFRACON, etc. The regional officers of this ministry stationed in the capital city of states are monitoring the construction and maintenance of the national highways in the country.
